

DESCRIPTION

Gravity Coil is an equipment provided with a coil which acts as a heat exchanger, cooling the space where it is installed and fitted as high as possible in the ceiling.

Ambient heat is absorbed by the chilled water, thus the atmosphere is cooled.

This unit includes a condensate drip pan with drain connections.

*Control System
(See page 9).

DATA SHEET

MODEL	COOLING CAPACITY (kW)	APPROX. DIMENSIONS (mm) Front x Depth x Height	APPROX WEIGHT (Kg)
3G	1,0	1050 x 740 x 270	45
5G	1,5	1050 x 740 x 270	48

MATERIAL SPECIFICATION

- › **Cooling Coil**
 - Copper tubes and fins
- › **Drain Pan**
 - Stainless Steel
- › **Finishing:**
 - Prepainted

APPLICATIONS

Gravity Coils are used primarily in spaces where the thermal load is small and electrical equipment (that could spark) would constitute a hazard, such as magazines where air conditioning is required.

SPECIAL UNIT:

Tailor Made wall version, to be installed in rooms where the space under the ceiling is limited.
